EDUCATION

San Jose State University– *San Jose, CA* **Sept 2023 – Dec 2026**
Bachelor of Science, Data Science

De Anza College– *Cupertino, CA* **Graduated Spring 2023**
Associate of Arts in Liberal Arts & Sciences

AI4All Program– *San Jose, CA* **Summer 2026**
AI4All — AI/ML Fellowship

- Selected for a competitive national AI program; building a real-world AI/ML portfolio project in a team setting over 13 weeks, followed by 7 weeks of career readiness including resume support, interview prep, and a Student Symposium presentation to industry professionals.

Ha Noi Bistro – *Fremont, CA* **April 2024 – Present**
Shift Leader

- Led front of house operations for a team of 15 staff during shifts, coordinating scheduling, service flow, and issue resolution to maintain consistent customer experience.
- Built inventory tracking spreadsheets in Google Sheets, reducing stock discrepancies and improving reorder accuracy.
- Created standardized staff checklists and shift documentation, reducing new hire onboarding time by approximately 50%.
- Partnered with management to clarify decision making authority and team structure, improving cross team communication between front of house and kitchen staff.

The Braven Accelerator – *San Jose, CA* **Jan 2026 – May 2026**
Fellow

- Developing workforce skills such as leadership, organization, communication, teamwork, and problem solving by completing a 14-week leadership and professional development course.
- Designing a career roadmap by engaging in a 7-step process that requires self-assessment and reflection, as well as role investigation and evaluation to determine the steps required to achieve career goals.

GaoTek Inc - *Remote* **Mar 2024 – Jun 2024**
Technical Support / IT Helpdesk Intern

- Provided technical support for 50+ product lines, resolving hardware/software issues and reducing average ticket resolution time by ~20% through systematic troubleshooting documentation.
- Developed and published 15+ product web pages and datasheets, improving product discoverability and customer self-service access.
- Enhanced a user profile feature used across the platform, contributing to a smoother onboarding experience for new users.
- Executed hardware/software QA test cycles and logged defect reports, helping maintain product quality standards ahead of customer shipments.
- Produced technical documentation and internal presentations, streamlining knowledge transfer across the support team.

Webtunix Borderless Investment – *San Jose, CA* **Aug 2021 – Jan 2022**
Legal Assistant Intern

- Assisted 20+ clients with immigration and investment forms, reducing errors in submissions and improving client satisfaction scores.
- Conducted legal research across 10+ case files, compiling summaries and evidence that directly informed
- attorney case strategies.

- Produced professional legal documents, briefs, and presentations using Word, Excel, and PowerPoint, cutting document turnaround time by approximately 30%.

PROJECTS

NOAA Coastal Data Visualizer (github.com/dannguyen02/cs122_Project) **2026**

- Built a Python desktop application that retrieves live oceanographic data (water temperature, sea level) from the NOAA Tides and Currents API for any user-selected station and date range.
- Implemented a Tkinter GUI with dropdown menus and input fields; processed JSON API responses into pandas DataFrames, stored results as CSV files, and rendered time-series visualizations with matplotlib.
- Automated a data analysis pipeline computing average, max, and min values per query — enabling non-technical users can explore real coastal conditions without manually processing raw datasets.

Amazon River Outflow Ocean Simulation (github.com/dannguyen02/Amazon-River-Outflow-Project) **2025**

- Built an oceanographic simulation using the MIT General Circulation Model (MITgcm) to model the impact of Amazon River freshwater discharge on coastal salinity, temperature, and circulation patterns along Brazil.
- Configured model grid, bathymetry, and external forcing conditions using GEBCO bathymetry data and Jupyter Notebooks; processed and visualized 5 ocean variables (ETAN, THETA, SALT, UVEL, VVEL).
- Identified measurable salinity gradients and sea surface height anomalies within the plume zone, validating model output against known oceanographic behavior.

SKILLS, TECHNOLOGIES, LANGUAGES & INTERESTS

- **Skills:** Statistical Modeling; SQL Server; Python (NumPy, pandas, matplotlib, scikit-learn); Data Analysis; Machine Learning; Java; C++; Rustlings; Team Management; Technical Writing
- **Technologies:** MS Office Suite (Word, Excel, PowerPoint); Visual Studio; Eclipse; SQL; Jupyter Notebook; Google Colab; Docker; Google Cloud; Tkinter
- **Languages:** English (Fluent); Vietnamese (Fluent)
- **Interests:** Technology-Driven Solutions; Data Analysis; Team Building; Innovation
